To Whom It May Concern

Lausanne, January 7, 2013

CERTIFICATE

We hereby confirm that

Mr. Pooya PAKZAD
born on May 19, 1981

joined the Laboratory for Computer Applications (LCA) at EPFL in November 2009, as an engineer, working on the routeRANK R&D project.

routeRANK provides a software solution for travel planning. Unlike other solutions that consider only one means of transport at a time, routeRANK addresses the entire travel route by integrating rail, road and air connections. In a single search, it's patent-pending technology finds and ranks the best possible travel routes, allowing users to sort them according to their priorities such as price, travel time and CO2 emissions.

Pooya Pakzad worked on the code of the application, maintaining and extending it, including the design, implementation and optimization of new functionality, and covering also database and system administration.

His research and development work was fully satisfactory. Pooya Pakzad is very skilled with algorithms. He is reliable, takes initiative and works independently.

He decided to change career path and left us in May 2011. I recommend him to you highly and remain at your disposal should you require any additional information.
