Scrum and Agile Practices
Introduction and Implementation

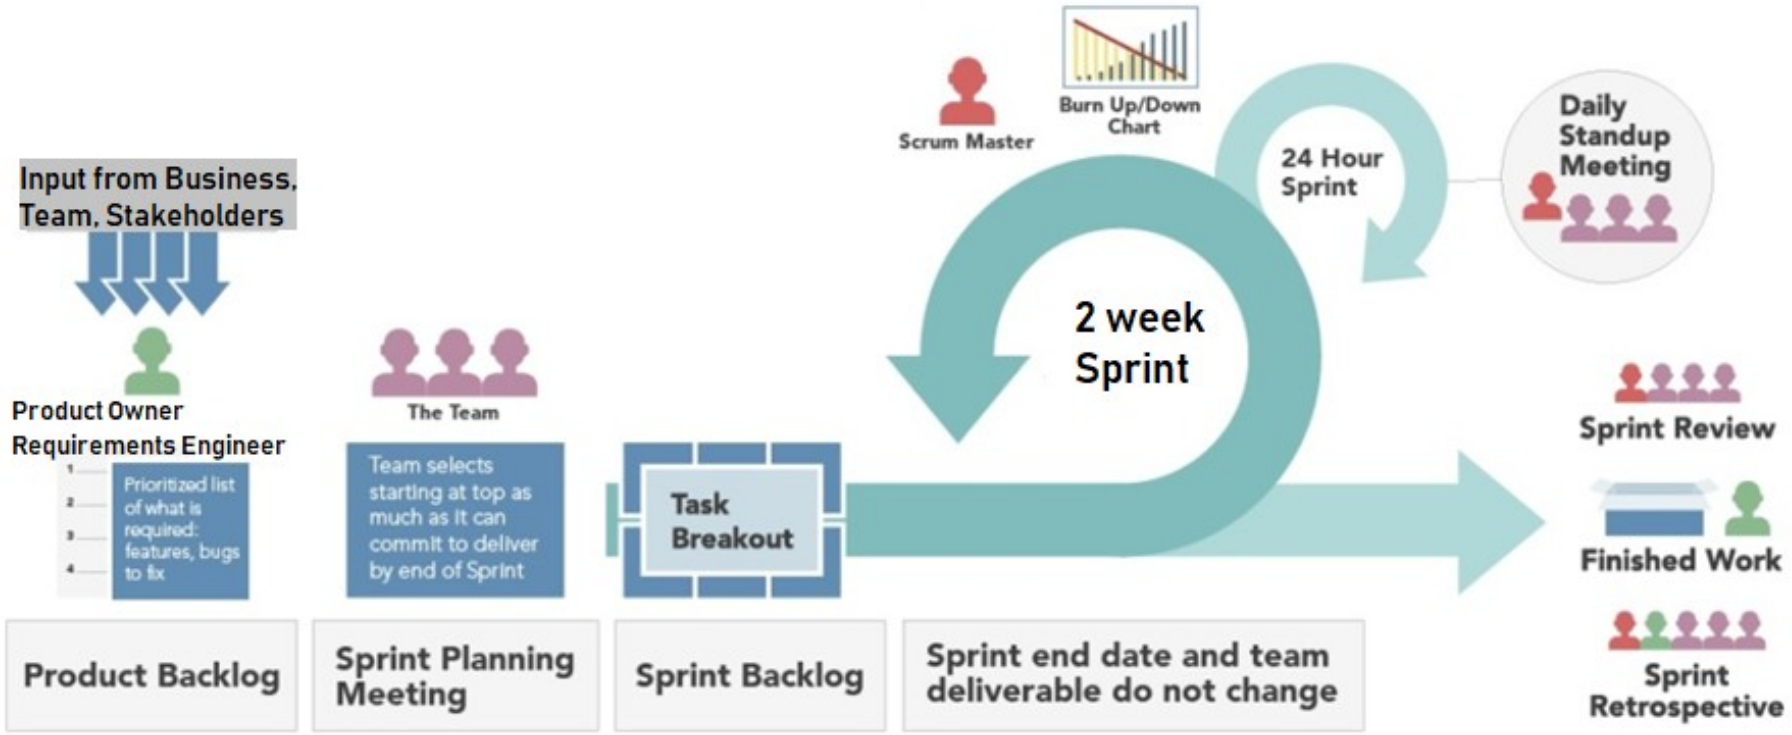

Pooya Pakzad Feb 19th, 2021

Financial Institutions Agile Transformation
Workshop Agenda

1. Introduction and setting goals
2. Motivation
3. Agile Teams and Practices
4. Backlog Stories
5. Retrospective
6. Next Step

Big Picture
Goal: Where to focus

Introduction

The Agile Manifesto

Individuals and Interactions	over	Processes and Tools
Working Product	over	Comprehensive Documentation
Customer Collaboration	over	Contract Negotiation
Responding to Change	over	Following a Plan

That is, while there is value in the items on the right, we value the items on the left more.

Why Agile?

Anwendung agiler Projektmanagement-Methoden

Welche agilen Projektmanagement-Methoden werden angewendet bzw. planen Sie anzuwenden? | Mehrfachnennungen
Basis: Unternehmen mit mind. 500 Mitarbeitern, die agile Methoden im Projektmanagement anwenden oder planen diese anzuwenden (n=198)

bitkom research

Activity 1
Numbers and Letters

1. Write down numbers 1-26

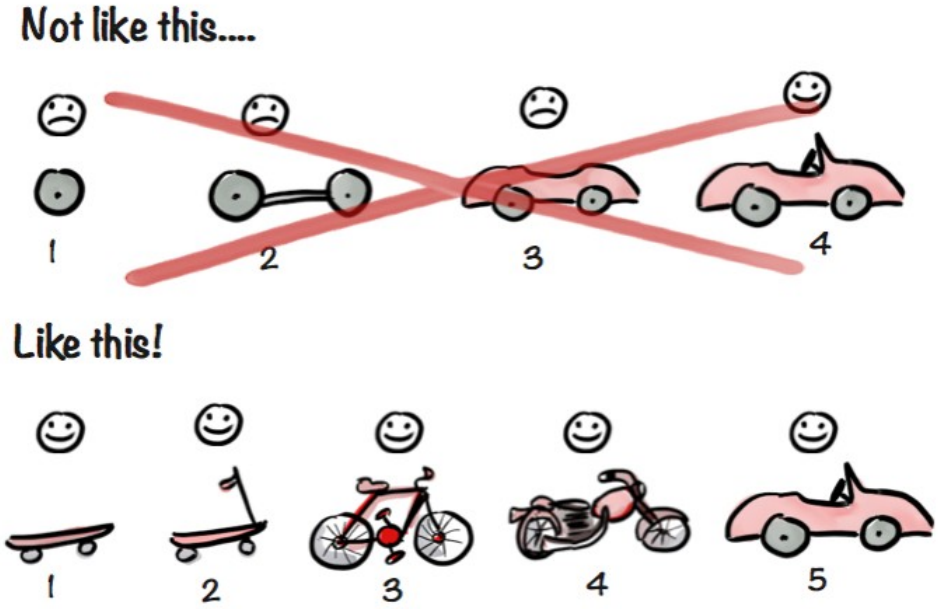

2. Write down letters A-Z

3. Write down the following sequence 1A, 2B, …, 26Z

Motivation
Benefits of Agile Development

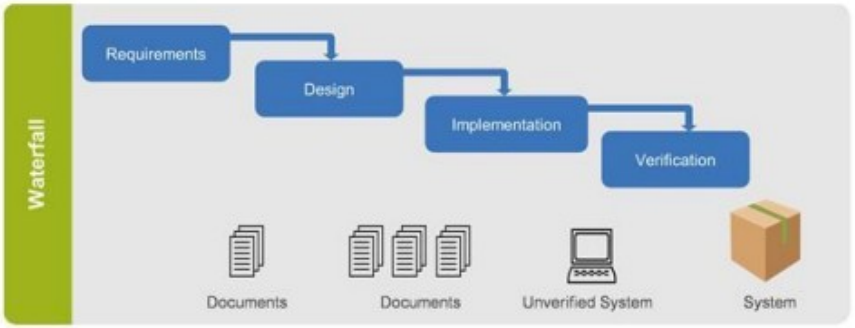

- **Improved Quality**
- **Focus on Business Value**
- **Focus on Users**
- **Stakeholder Engagement**
- **Transparency**
- **Early and Predictable Delivery**
- **Predictable Costs and Schedule**
- **Allows for Change**

Motivation
Agile vs. Waterfall Development

- Waterfall development
  - Too much WIP
  - Frequent context switching
  - Increased overhead
  - Delivery of value at the end
- Agile development
  - Reduced and visualized WIP
  - Incremental development
  - Early and continuous value delivery

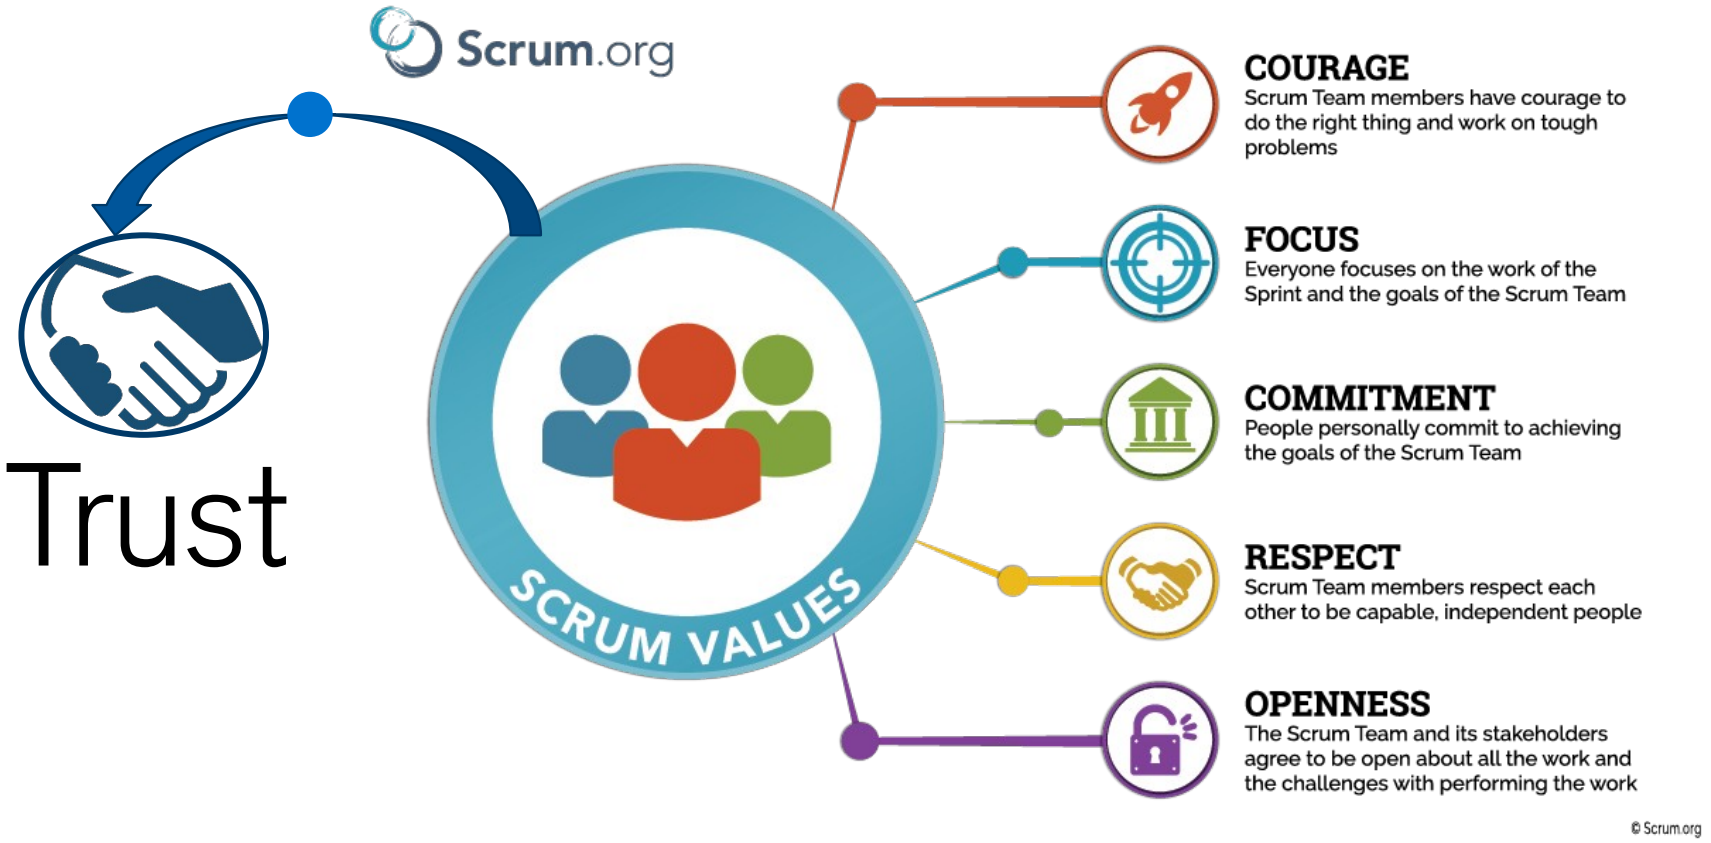

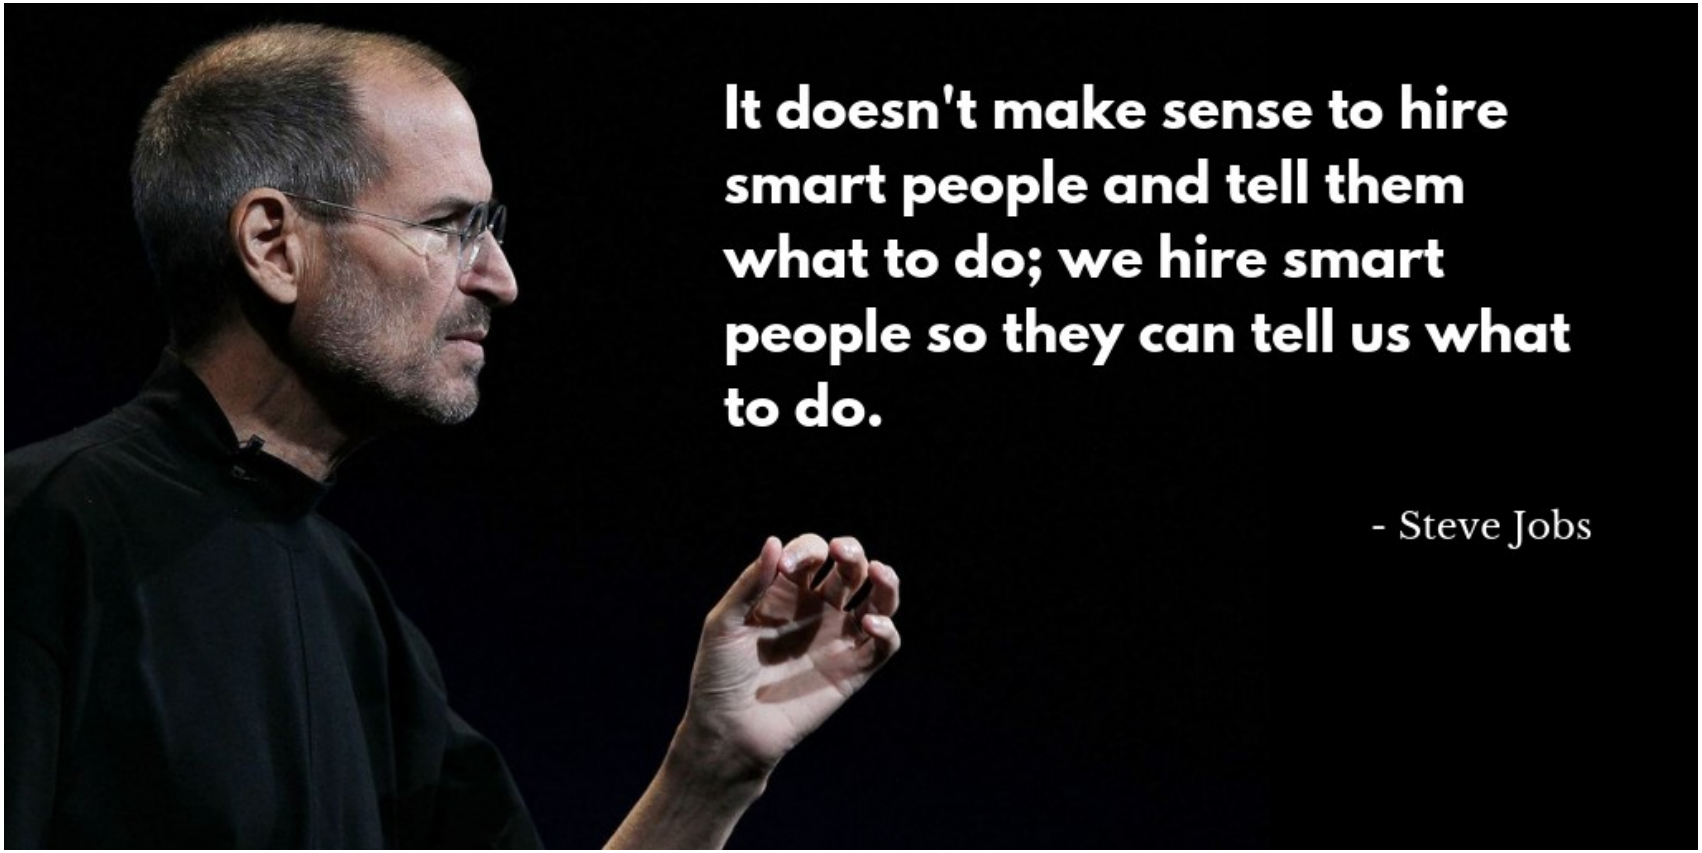

Motivation
Agile Development: Deliver value incrementally

Motivation
Scrum Values

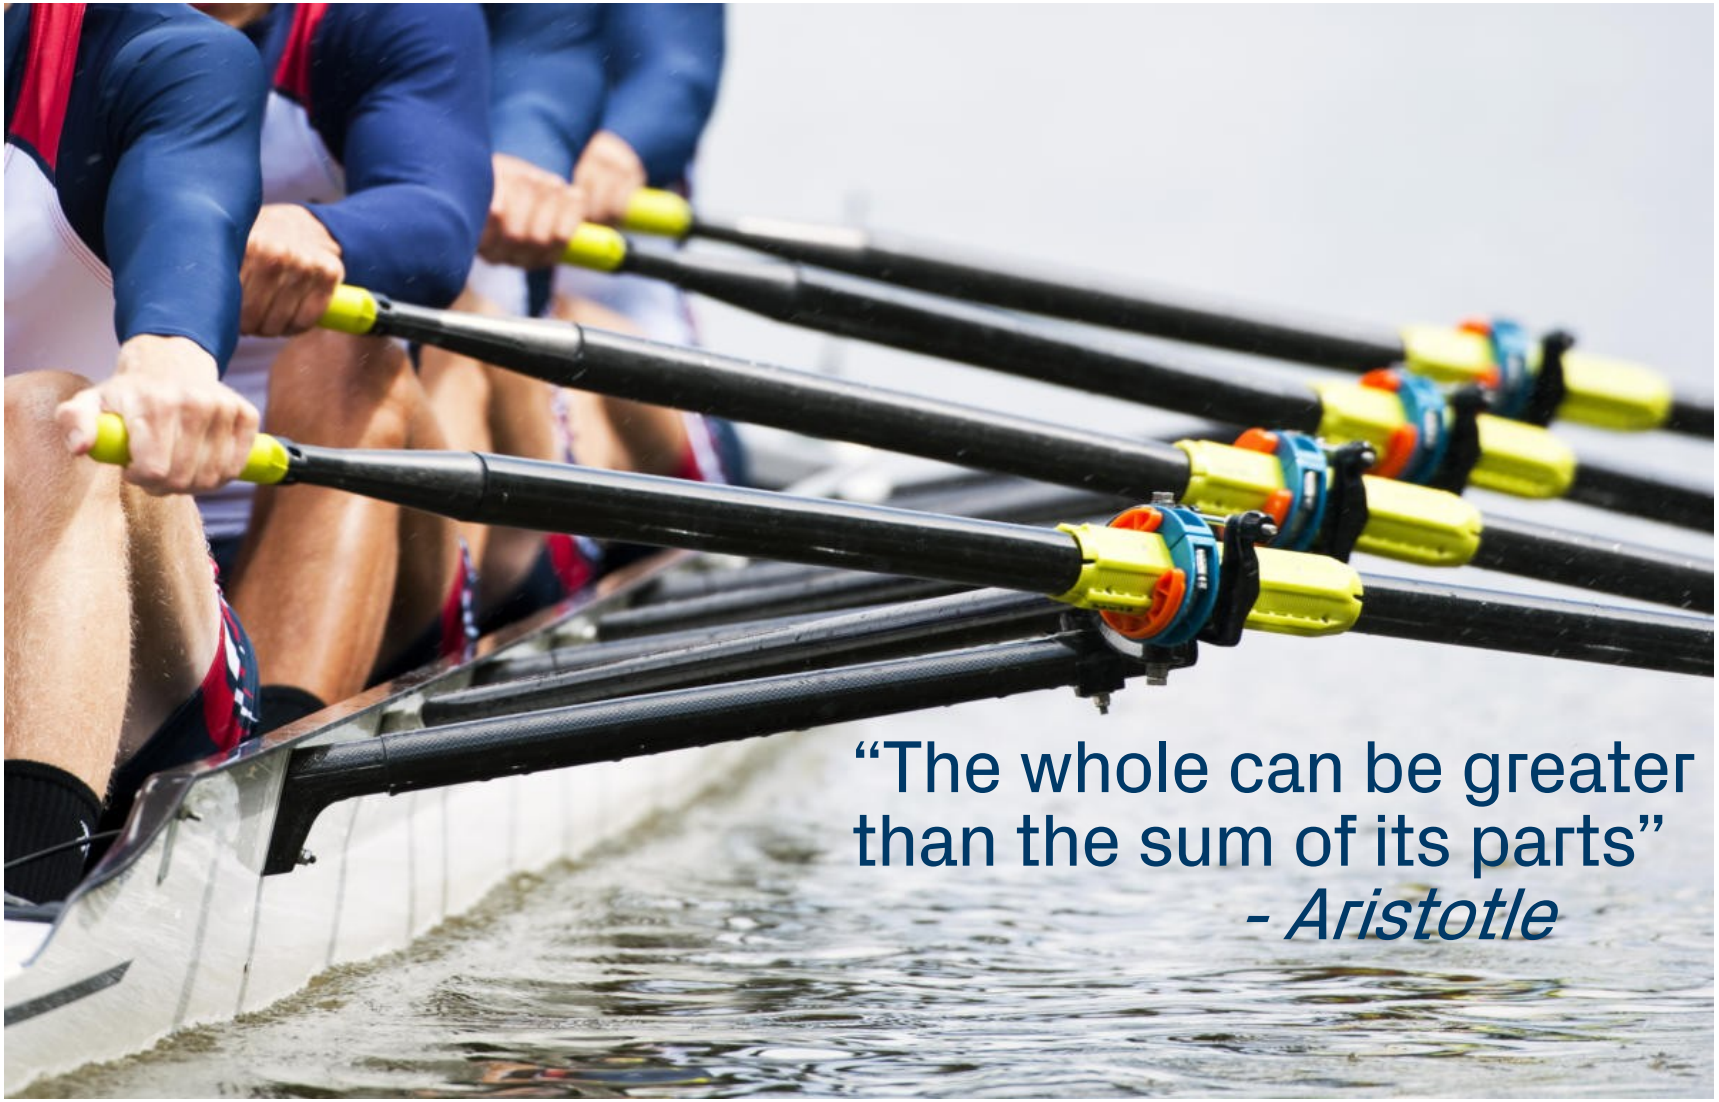

Motivation
Trust

5. Retrospective
6. Next Step

Agile Teams

What are Agile Teams?

► Agile Teams are **cross-functional**, **self organizing** entities that can *define*, *build*, and *test*, and where applicable deploy, increments of value

► Optimized for communication and delivery of value

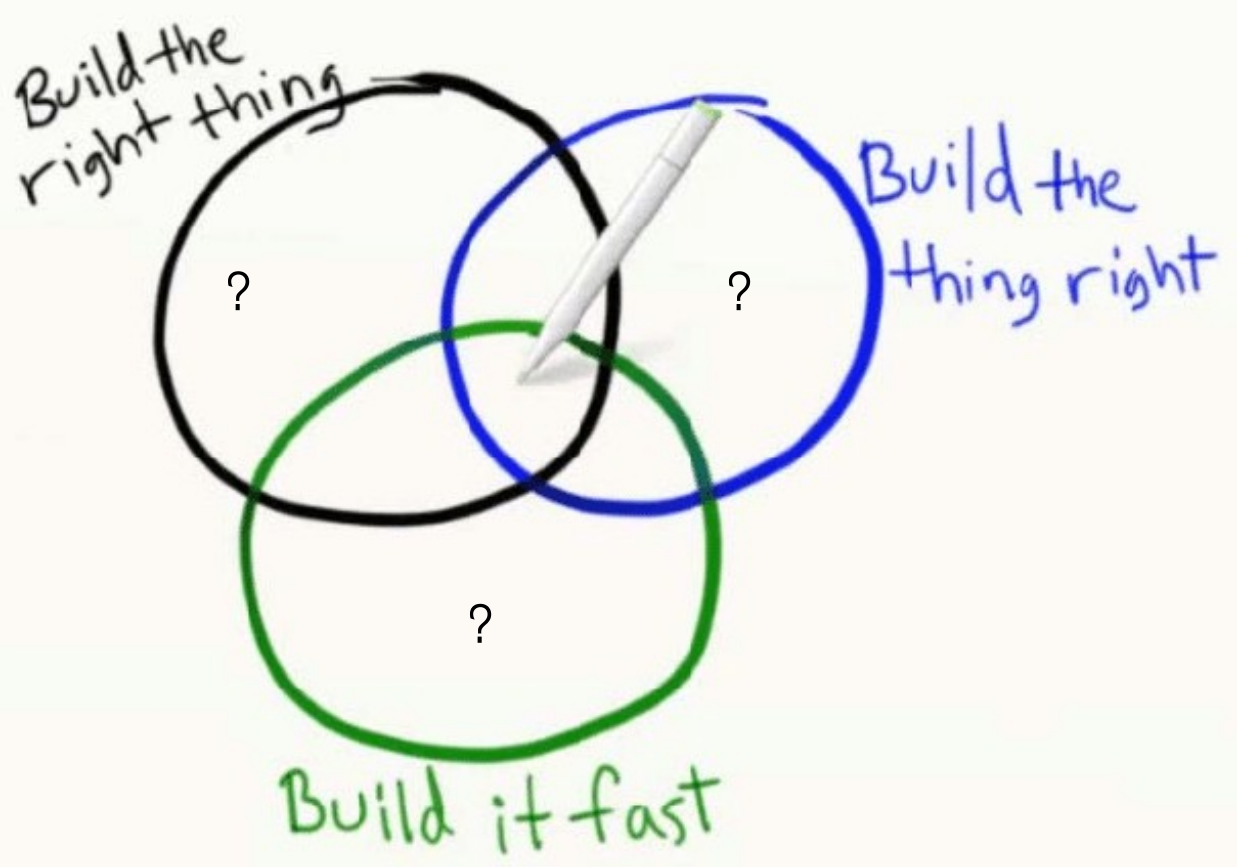

► Deliver value every two weeks

► Team Agility (Scrum) and Technical Agility (Built-in Quality practices)

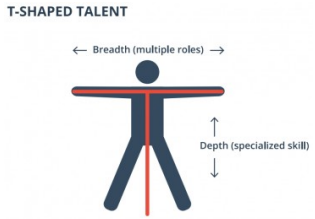

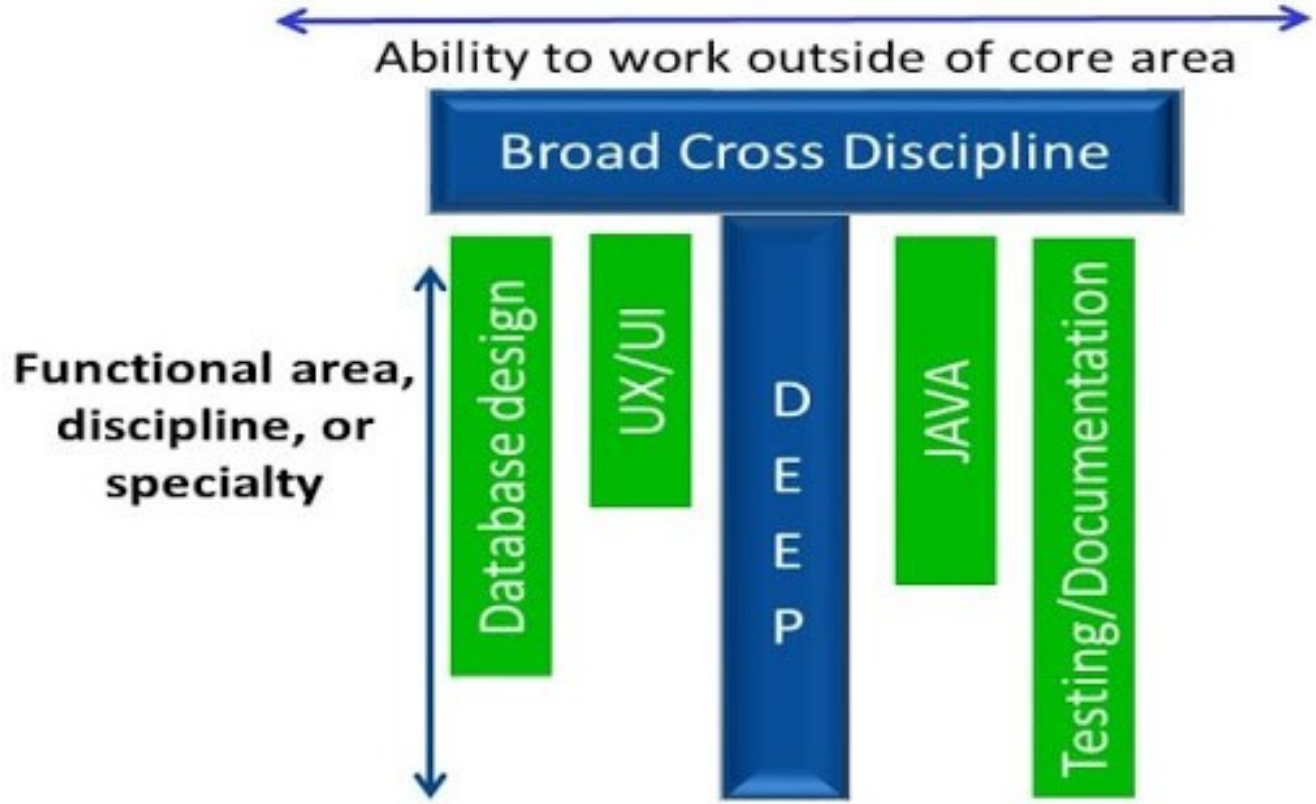

Scrum Team
Roles

Cross-Functional Agile Teams
T-Shaped Professionals

Cross-Functional Agile Teams
Ownership

- Who owns the stories?
- Who commits to the stories?
- Who is accountable for the sprint results?
- Who is accountable for quality?
- Who is responsible for making decisions?

Agile Teams
Common attributes of high performing teams

- Self-organizing
- Understand work's impact on organization
- Effective decision-making
- Aligned and collaborative
- Open and clear communication
- Safe atmosphere to take risks
- Valued diversity
- Effective timely feedback
- Mutual trust
- Sufficient resources for local control
- Healthy conflict
- Success focus over failure avoidance
- Clear goals and purpose
- Abilities balanced with challenge
- Concentration and focus
- Engagement
- Fun with work and each other
- Ownership and accountability

4. Backlog Stories
5. Retrospective
6. Next Step

Product Backlog

It contains all things. If an item is in there, it might get done. If it isn't, there is no chance that it will get done.

Backlog Story

A problem well-stated is half-solved.

- Charles Kettering

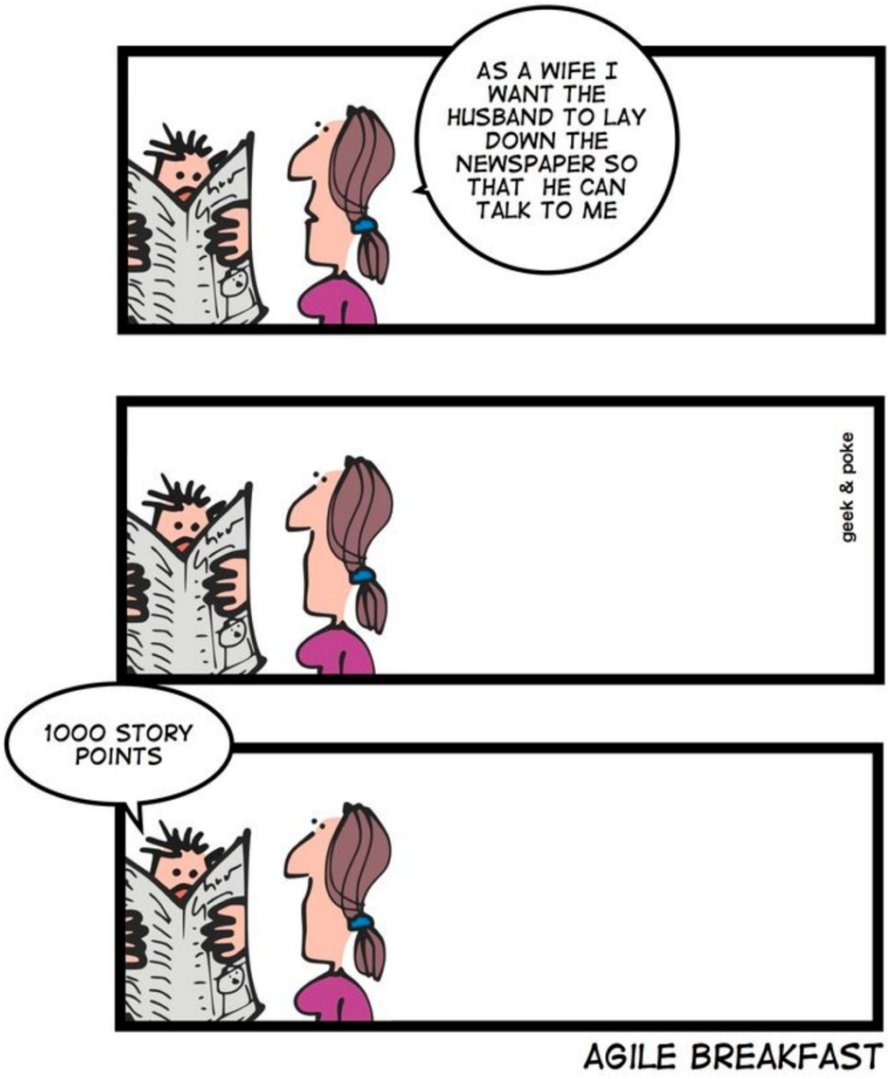

User Stories
INVEST in a good Story

- Write Stories that can be developed separately
- Write Stories in which scope can be negotiated
- Write Stories that are valuable to the Customer
- Write Stories that can be estimated
- Write Stories that can fit in an Iteration
- Write Stories that are testable

Story telling

- As a {the *who*},
- I want {the *what*},
- So that {the *why*}.

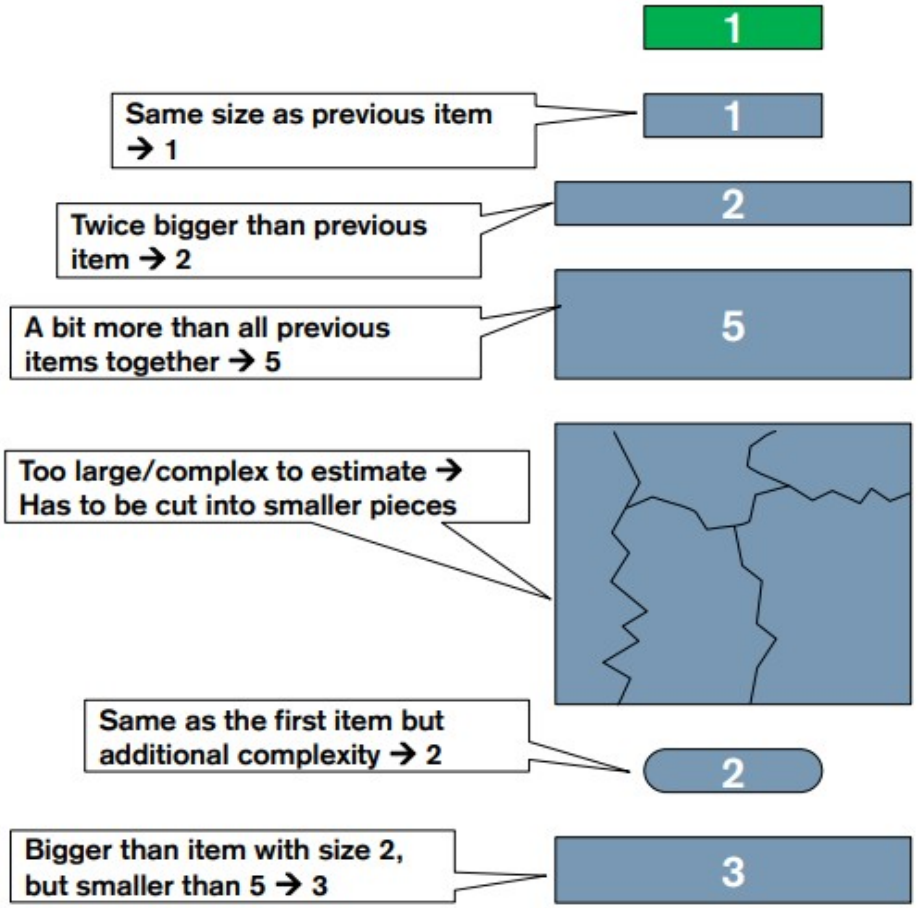

Gherkin Scenario
Given {…} when {…} then {…}.

Delivery Management
Story Point Estimation

Continue estimating the other Product Backlog Items compared to already estimated ones

Story Size / Complexity:

1 = very small
2 = small
3 = small to medium
5 = medium
8 = medium to large
13 = large
21 = very large
34 = too large

Activity 2
Story Estimation

Agile Development
Defined by Values and Principles

Scrum Ceremonies

- Grooming
- Planning
- Daily Stand-Up
- Review (Demo)
- Retrospective

Practices

- Timeboxing
- User stories
- Test driven development
- Continuous integration
- Inspect and adapt

3. Agile Teams and Practices
4. Backlog Stories
5. Retrospective
6. Next Step

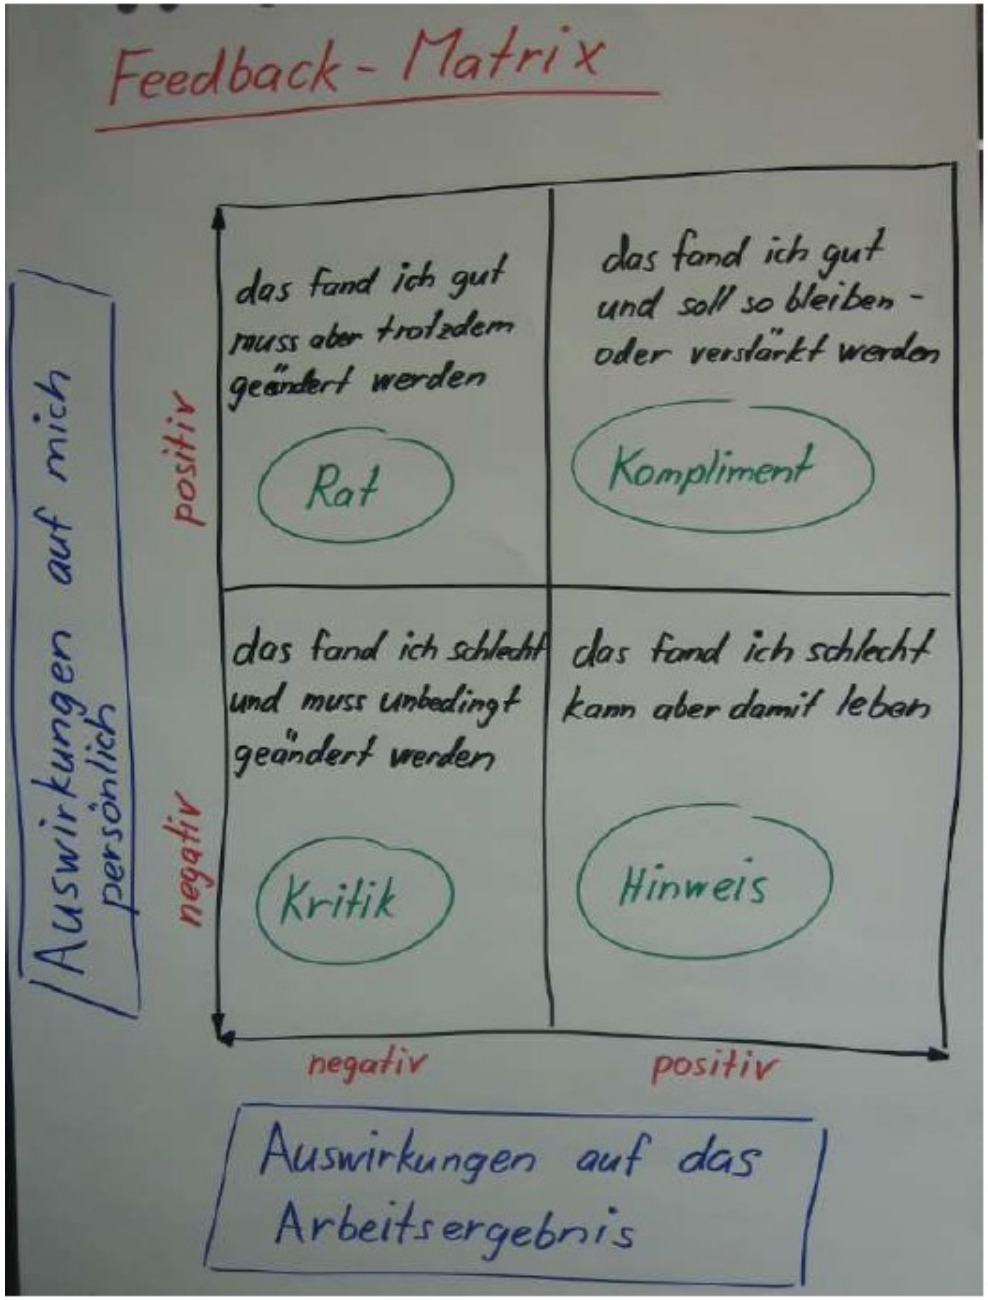

Retrospective
Self-Organizing Team

Most crucial chance for the team to self organize.
Empowered teams, making their own decisions in a safe environment.
Who should attend? TEAM (Development Team, Product Owner, Scrum Master)
Antipattern: Management attends Retro!
